Biophysical Society Selects *Biophysical Journal* Paper of the Year for 2015

The Biophysical Society is pleased to announce that Jochen S. Hub of Georg-August-University Göttingen has been selected the winner of the *Biophysical Journal* Paper of the Year Award for 2015. His paper, "Interpretation of solution X-ray scattering by explicit-solvent molecular dynamics" was published in Volume 108(10) of *Biophysical Journal*.

This award was established to recognize one outstanding paper by a corresponding author who is also a young investigator. Papers are nominated for the award by the Associate Editors of the Journal.

"A central focus of structural biology is to determine how molecules dynamically reorganize to perform their functions in solution; this paper fully integrates experiments with simulations to help reach this holy grail, noted *Biophysical Journal* Editor-in-Chief Les Loew. "*Biophysical Journal* takes great pleasure in recognizing this excellent paper by such a talented young investigator."

Hub will receive a monetary prize and a plaque, and will present a short talk at the Award Symposium, during the Biophysical Society Annual Meeting on Tuesday, March 1, 2016.

The Biophysical Society, founded in 1958, is a professional, scientific society established to encourage development and dissemination of knowledge in biophysics. The Society promotes growth in this expanding field through Biophysical Journal, its annual meeting, and committee and outreach activities. Its 9000 members are located throughout the U.S. and the world, where they teach and conduct research in colleges, universities, laboratories, government agencies, and industry. The annual meeting draws over 6500 scientists, and will be held February 27-March 2, 2016 in Los Angeles, California.

Biophysical Journal (BJ) is the leading international journal for original research in molecular, cellular, and systems biophysics. Modern biophysics is a broad and rapidly advancing field encompassing the study of biological structures with a focus on mechanisms at the molecular, cellular, and systems level using the concepts and methods of physics, chemistry, mathematics, engineering, and computational science. Research on a broad range of biological problems is unified when approached with this common set of intellectual tools.

OFFICERS

President
Edward Egelman
University of Virginia

President-Elect
Suzanne Scarlata
Stony Brook University

Past-President
Dorothy Beckett
University of Maryland,
College Park

Secretary
Frances Separovic
University of Melbourne

Treasurer
Paul Axelsen
University of Pennsylvania

Executive Officer
Rosalba Kampman
Biophysical Society, Rockville

COUNCIL

Olga Boudker
Ruth Heidelberger
Kalina Hristova
Juliette Lecomte
Amy Lee
Robert Nakamoto
Gabriela Popescu
Joseph D. Puglisi
Michael Pusch
Erin Sheets
Antoine van Oijen
Bonnie Wallace

BIOPHYSICAL JOURNAL

Editor-in-Chief
Leslie Loew

COMMITTEE CHAIRS

Awards
H. Jane Dyson

Early Careers
Prithwish Pal

Education
